CRESTRON®

Strategic Communications - 502-493-7234 - sales@yourstrategic.com - www.yourstrategic.com

# Easy to Deploy, Easy to Use, Easy to Manage

### Dual LAN ports

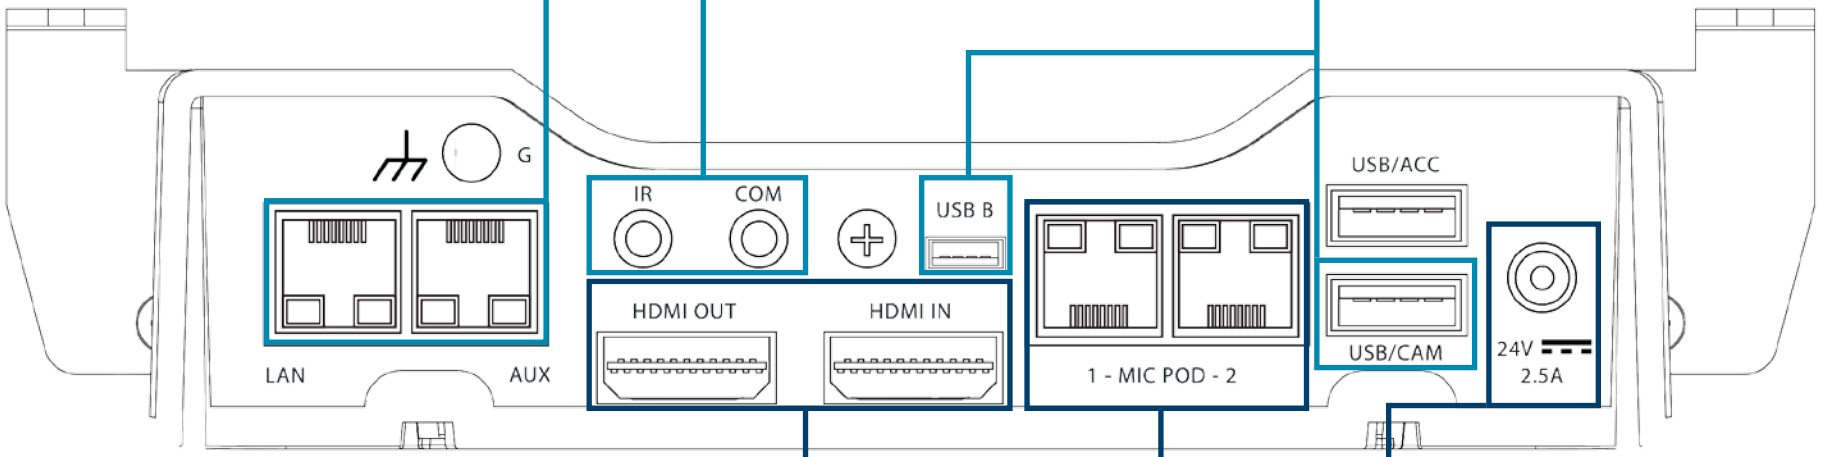
- Enable different applications on different physical networks to fit your infrastructure. Put voice or AirMedia (or both) on a secondary LAN port to keep it segmented

### Universal TV control

- Control any TV in your rooms. Crestron supports RS-232, CEC, and IR control while allowing you to add your own drivers

### USB Camera In & Out

- Use the room camera rather than the laptop camera for web conferencing so that the far end can see the whole room.
- Plus, enjoy superior audio, leveraging the professional built-in speakers and microphone.



### HDMI® In & Out

- Display video conference screen and presentation content running on your laptop on the large screen TV in the room.
- Connect a laptop or other HD source (optional – activate and manage license as needed)

### Microphones

- Add up to two Mercury microphone pods for larger tables – provides convenient remote mute buttons for participants at seats all around the table

### Power over Ethernet Plus or 24V power supply
